5 "mini-cours" (each 3 x 45 minutes)	
Speaker	Title
O. Benoist	Compactified moduli of canonically polarized varieties
J. Fasel	Cohomological classification of vector bundles over smooth affine varieties
F. Loray	Transversely projective foliations
A. Sarti	Automorphisms of Hyperkähler manifolds
C. Simpson	Large Geometry of compactifications of representation varieties
8 talks of 50 minutes	
Speaker	Title
F. Lo Bianco	Une application de l'intégration p-adique à la dynamique d'un automorphisme préservant une fibration
V. Benedetti	Orbital degeneracy loci
Y. Brunebarbe	Hyperbolicity of varieties supporting a variation of Hodge structure
J. Cao	Un théorème de décomposition des variétés à fibré anticanonique nef
S. Filippini	Stability data, irregular connections and tropical curves
V. Hoskins	Group actions on quiver moduli spaces and applications
A. Perego	Kählerianité des espaces de modules de faisceaux stables sur les surfaces K3 non-projectives
X. Rouleau	Irrationality of cubic threefolds by their reduction mod 3
