

2021 Spring School in Theoretical Computer Science (EPIT)

References on quantum complexity theory

Thomas Vidick, California Institute of Technology

May 25, 2021

- Survey of quantum complexity classes by John Watrous [Wat08].
- Survey on “Quantum Proofs” [VW16].
- The proof of QMA-completeness of the local Hamiltonian problem originally appears in the book [KSVV02].
- Classification of the complexity of local Hamiltonian problems for restricted types of interactions [CM16].
- For a discussion of QCMA, see [AK07]. The class QMA(2) is studied in [ABD⁺08].
- Bouland et. al paper on RCS [BFNV18]. See also [BFL21] for recent follow-up work.
- Test of quantumness [KMCVY21]. See also [BCM⁺18] for a version based on Learning with Errors.
